

Antique Spalding White, Golf Ball
Spalding

£280

REF: 30858

Diameter: 4.4 cm (1.7")

Description

Spalding Bramble Pattern Golf Ball, Spalding White.

An excellent example of bramble patterned rubber core golf ball by A.G. Spalding & Bros. The golf ball is in great condition, both poles with 'Spalding White' in raised lettering around a single bramble. It is with the classic bramble pattern, raised dimples.

The ball is approximately 4.4 cm in diameter.

The rubber core ball (the ancestor of the modern ball) began its life in the late 1890's. The first mass produced rubber core ball was by Coburn Haskell of Cleveland, Ohio. The first core balls were hand wound with elastic thread with a Gutta-percha cover, moulded with the raised square mesh pattern of their predecessor. The slight irregularities in the early wound balls made them quite lively, it was not until the invention of the automatic winding machine by John Gammeter (an engineer at Goodrich) and the change of pattern from mesh to bramble that the balls became more consistent and predictable. In later years, the 1920's, the design went back to a mesh pattern with lattice design.
