Harry Vardon

£125

REF: 31805

Height: 89 cm (35")

Width: 9.5 cm (3.7")

Depth: 2.2 cm (0.9")

Description

Arthur Brown and Harry Vardon Model Putter By William Gibson.

Hickory golf club putter by William Gibson, Fife, endorsed by six times British Open Champion, Harry Vardon. The club carries the Arthur Brown and Harry Vardon endorsement autographs on the crown with Gibson's 'Out Line Star' cleek mark and 'THORNTON'. The sole of the club with the words 'Medium Lie, Reg No. 593863, Warranted Hand Forged, Made In Scotland'. The club has the original hickory shaft, round handle terminating into an oval hosel, a replaced suede leather grip, the face with hand punched dot face markings, the head with a curved back. Vardon joined forces with Arthur Brown, a writer and amateur golfer, to design this putter. The model was covered under a British registered design (Reg No. 593863) in 1911 and was a very popular putter in it's day and a great usable collector today.

The measurements provided refer to the length of the shaft including the hosel, as well as the width and depth of the face.

These hickory putters are not only collectible but also great fun to use. Ideal for a regular four-ball looking to add a bit of novelty to their game, perhaps with a forfeit twist: the winner of the match must use the putter in their next round.

Some clubs will have a patent number or a registered design number. The difference being, the patent protects the invention, focusing on functionality and how it works, whilst a registered design protects the visual appearance, such as its shape, pattern or ornamentation.

Gibson's 'OUTLINE STAR' cleek mark was registered in 1906, although it had been used since Gibson began his business in the 1890's and was replaced with the 'DEEP STRUCK STAR' in the 1930's. William Gibson was born in Kirkcaldy in 1868 and originally worked as a blacksmith. He apprenticed with James Anderson, Anstruther, during the late 1880's and by 1897 was part of the small firm of Stirling and Gibson based in Edinburgh. Upon his partners death in 1899 the firm's name changed to William Gibson & Co, moving to Kinghorn, Fife, in 1903. Initially he kept to only producing cleeks but by 1905 he had launched into full club making production, both irons and woods, with the clubs sporting the famous 'star' cleek mark. In 1906 Gibson started to produce what would become one of his most popular clubs and largest sellers the 'Genii' model. The clubs were revolutionary and were patented by Hugh Logan, with their offset head and goose neck hosel, they could be customised to suit most players requirements. Gibson's other successful line was the easily recognisable 'Star Maxwell' irons with their drilled hosels and flanged soles based on the patented design by Robert Maxwell. The business kept expanding and Gibson was acknowledged as one of the world's largest producer of golf clubs. His huge success was due to him being very open minded regarding club production and new designs, leading him to produce several economy brands as well as his top brands. He died in 1921 leaving his son George to continue running the business, though eventually going into voluntary liquidation on 1st July 1955.
