Sold

REF: 28643

Height: 80 cm (31.5")

Width: 18 cm (7.1")

Depth: 19 cm (7.5")

Description

Antelope Oryx Horns.

A great looking pair of Gemsbok Oryx horns and skull plate, mounted onto a round wooden shield. The long straight rapier horns in very nice condition.

The African Oryx, or Gemsbok (Oryx Gazella), is a large Antelope that is native to the Kalahari Desert. The Gemsbok or Oryx are easily identifiable by their long straight horns that average 34 inches in length and with their pale fur with contrasting dark markings in the face and on the legs. The Oryx are herbivores which lets them survive without water for long periods due to their diet of succulent roots and melons. The Gemsbok is swift-footed and dangerous and has been known to spear lions with their long horns.
