Description

VINTAGE OBSERVATION BINOCULARS.
A pair of Polish ex military observation binoculars on original adjustable wooden tripod and with original grey paint finish. The 45º incline eyepieces can be altered for the distance between the eyes simply with a turn of a knob. The optical quality of the lenses is excellent. This is a fine pair of binoculars with a mounted quick sight (commanders auxillary sight), which is a monocular telescope for observation, but at a right angle from the main binoculars for a second observer. The binoculars come with a read out for both lateral position and elevation and they have handles either side for a greater freedom of movement.
