REF: 26011

Height: 89 cm (35")

Diameter: 4.5 cm (1.8")

Description

Antique Walking stick with Compass.
A very unusual gentleman's walking cane with built-in compass. The shaft is made of hardwood, probably polished hickory or mahogany with a bone ferrule, silver collar and an ivory handle. The top of the ivory handle will unscrew to reveal a hidden German made compass. The silver collar has a Chester hallmark with S.B&S.T.L in an oblong chamfered rectangle. This is the maker's mark of S. Blanckensee & Son Ltd. All in original condition, ivory handle does have a small crack.
